

## Inflatable Fabric - Haining Comax New Material Co., Ltd.

### Inflatable Castle Material – PVC Inflatable Fabric 1000D\*1000D

20\*22 610gsm 0.55mm

Inflatable castles, beloved fixtures at children's parties and events, are typically constructed from solid and lightweight materials like PVC (polyvinyl chloride) or nylon. PVC, renowned for its durability and weather resistance, is often the top choice for commercial-grade inflatable castle material. It provides the flexibility necessary for inflating and deflating while withstanding the rough and tumble of play. However, nylon is also famous, as it's lighter and easier to handle.

### Technical Data Sheet

Item Code	SVTIF1022610	Test Method	
Base Fabric	1000D*1000D 20*22	DIN EN ISO2060	
Weight (GSM)	610	DIN53352	
Tensile Strength	Warp (N/5cm)	2500	DIN53354
	Weft (N/5cm)	2400	DIN53354
Tear Strength	Warp (N/5cm)	300	DIN53363
	Weft (N/5cm)	300	DIN53363
Peeling Strength	Warp (N/5cm)	80	DIN53357
	Weft (N/5cm)	80	DIN53357
Temperature	-30°C/+70°C
